

Experts in Demand and Supply Planning Solutions

Netstock is a leader in inventory management and has earned the trust of over 2,200 global customers. Netstock empowers small-to-medium businesses to place orders quicker, reduce stock-outs, minimize excess inventory and optimize capacity planning. Delivering immediate ROI, Netstock provides customers with the visibility to free up working capital, adapt to market changes, and deliver outstanding customer service.

Netstock Predictor IA

Netstock Predictor IA seamlessly enhances the inventory capabilities within Sage ERP systems, generating prescriptive recommendations by unlocking and analyzing data. This empowers you to make informed decisions for optimized inventory supply and demand planning tailored to your business requirements. With Netstock, you gain the tools necessary to achieve optimal inventory management outcomes, including the ability to optimize stock levels, reduce excess inventory, and ensure timely order fulfillment.

With Sage and Netstock, you can:

1. **Reduce inventory levels between 10-25%:** reducing working capital and improving cash flow
2. **Improve fill rate by 10%:** minimizing stock-outs and increasing sales
3. **Reduce time:** quicker planning, forecasting, and ordering
4. **Increase visibility:** early warning of KPIS needing attention

Netstock Predictor IA Product Packages

Netstock offers three packages for customers to select, depending on their needs:

<h2>Essentials</h2> <ul style="list-style-type: none">+ Single-view Dashboard+ Classification Matrix+ Safety Stock+ Forecasting and Ordering+ Opportunity Engine™+ Executive Dashboard+ Supplier Performance	<h2>Advanced</h2> <p>Essentials bundle plus...</p> <ul style="list-style-type: none">+ Advanced Forecasting+ Stock Projection+ Extended Planning Horizon+ Report Builder	<h2>Commercial</h2> <p>Advanced bundle plus...</p> <ul style="list-style-type: none">+ Excess Redistribution+ SSO
--	---	--

Essentials

Includes the standard functionality

- + **Single-view Dashboard:** Gain visibility into inventory KPIs on a single dashboard, allowing you to focus on critical KPIs and align supply with demand effectively
- + **Classification Matrix:** Automatically categorize items based on sales volume and velocity, ensuring optimal inventory levels for each product
- + **Safety Stock:** Determine the appropriate amount of safety stock for each item, considering supply and demand risks
- + **Forecasting and Ordering:** Automatically select the best demand forecasting models for each item, customer, region, unit, price, cost, or margin. Intelligent analytics engines continuously learn and enhance forecast accuracy over time
- + **Opportunity Engine:** An AI-driven digital assistant that analyzes historical data to deliver actionable insights and recommendations that will make the most significant short-term impact on your business
- + **Executive Dashboard:** Offer executive teams a comprehensive overview of inventory and ordering KPIs, as well as overall sales performance

PLUS

- + **Supplier Performance:** designed for greater visibility of your suppliers, with the ability to download a projection of the orders you're likely to place in the future

Advanced

Includes the Essential package, plus

- + **Advanced Forecasting:** extend your forecasting and have more control to adjust and manipulate multiple inputs to improve forecast accuracy
- + **Stock Projection:** predict inventory levels 12 months in advance based on data currently in Netstock
- + **Extended Planning Horizon:** forecast 24 months of inventory and plan for extended lead times
- + **Report Builder:** easily generate tailored .xlsx reports, delivering essential insights for your business's day-to-day operations

Commercial

Includes the Advanced package, plus

- + **Excess Redistribution:** identify and redirect excess stock to required locations
- + **Single Sign-on:** authenticate a user once; communicating authentication to multiple applications
